

## MULTIPLES

(quantities greater than 1 all have capital letters)

$$K = \text{KILO} = \times 10^3 = \times 1,000$$

$$M = \text{MEGA} = \times 10^6 = \times 1,000,000$$

$$G = \text{GIGA} = \times 10^9 = \times 1,000,000,000$$

## SUB MULTIPLES

(quantities less than 1 all have small letters)

$$m = \text{milli} = \times 10^{-3} = \times 0.001$$

$$\mu = \text{micro} = \times 10^{-6} = \times 0.000,001$$

$$n = \text{nano} = \times 10^{-9} = \times 0.000,000,001$$

$$p = \text{pico} = \times 10^{-12} = \times 0.000,000,000,001$$
